

Predictive Analytics to Acquire, Develop, Lead and Engage Talent

# Organisational Competency Analysis

Harrison's library of leadership, emotional intelligence and team/ collaboration behavioural competencies enable your employees to compare their own behavioural tendencies to proven competency models.

Do you already have set organisational competencies or would like to create new ones? Harrison can assist in building a customized model that maps to your business strategies, mission/vision and cultural values.

## Many organisations profess to have behavioural competencies, however they often...

- do not clearly define what competencies actually mean in practice
- do not align competencies with organisational strategy
- do not have practices in place to optimize talent and self-awareness to impact business results

## Behavioural deficiencies do not show on your balance sheet, but dramatically impact it by...

- creating disharmony and costly employee turnover
- causing employee conflicts which hinder the organisation's ability to compete
- damaging your company's reputation, thus making talent acquisition more difficult
- stifling innovation, creativity, and employee engagement
- failing to establish internal talent pipelines by hoarding and suppressing talent

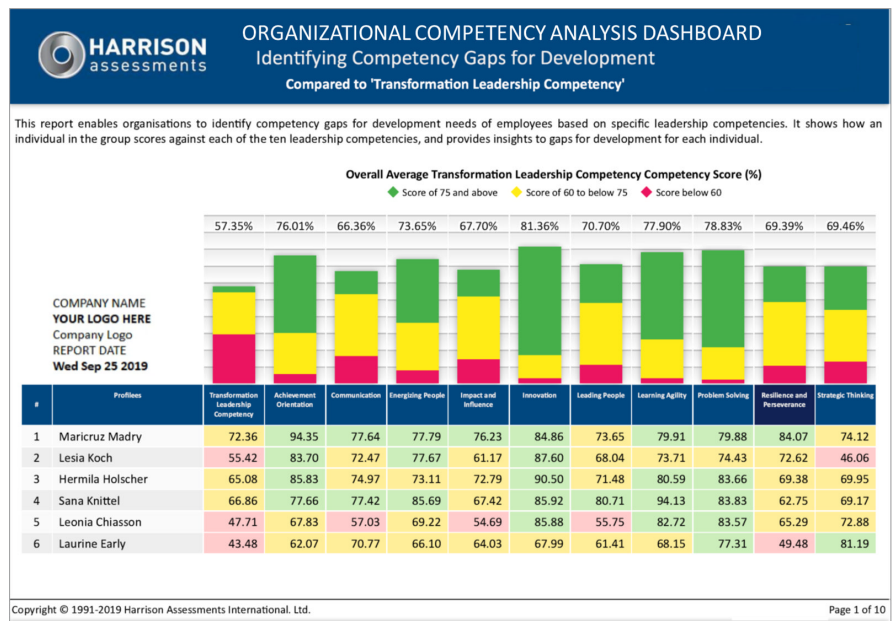

# Organisational Competency Analysis

## Identify Development and Training Needs

- Clarify the competencies required for organisational success
- Identify strong individual characteristics and determine if they are "derailers"
- Provide critical insights into mitigating the downside of potential "derailers"
- Map personal behaviours against a comprehensive set of organisational competencies
- Inspire change by recognizing individual strengths and pinpointing critical leverage points
- Build organisational capacity by investing in your employees and providing development opportunities which promote engagement and retention

## Data Analysis and Dashboard

- Coloured bar charts depict the distribution of employee within 3 ranges, enabling identification of strongest and weakest competencies
- Overall employee analysis can be sorted and ranked according to each competency
- A list of individual competency scores for each employee, colour coded according to range
- Individual competency analysis will display the individual employee's scores and can be ranked strongest to weakest
- Overall distribution of employees across score ranges can also be displayed as a group or team
